

## Instructions of call for full text of paper

### **SCOPE**

The proceeding of the "4<sup>th</sup> International Congress on Sickle Cell Disease, November 22-27, 2010" will be based on prevalence and distribution of HbS gene, genotype diagnostic criteria, development of screening facilities, counseling and education, identification of major challenges, research priorities, stem cell research, management of SCD, prevention of the disease, public awareness of the disease.

### **SUBMISSION OF MANUSCRIPTS**

Manuscript should be submitted online on **4scongress@gmail.com** to **Dr. P.K. Patra**, Organising Secretary, 4th SC Congress 2010, Centre for Genetic Diseases & Molecular Biology, Department of Biochemistry, Pt. J.N.M. Medical College, Raipur - 492 001 (Chhattisgarh), INDIA

### **PREPARATION OF MANUSCRIPT**

**General style:** Manuscript should be presented in as concise a form as possible and prepared in double space using word processing software such as MS Word. Pages should be numbered consecutively, and the matter should be arranged in the following order: title; name(s) of author(s); department(s) and institution(s); abstract; introduction; materials and methods; results (tables and figures); discussion; acknowledgement; and references.

**Title:** The title should be such as to be useful in indexing and information retrieval. It should be in bold capital letter.

**Abstract:** The abstract, usually not exceeding 250 words should indicate the scope and significant content of the paper highlighting the principal findings and conclusions. It should be in such a form that abstracting periodicals could use it without modification.

**Introduction:** The introductory part should be brief and state precisely the aim of the study. Reviewing of the literature should not exceed what is necessary to indicate the reason for the research undertaken and the essential background.

**Materials and Methods:** The nomenclature, source of material and procedures should be clearly stated to enable other workers to repeat the work if necessary. New methods should be described in sufficient detail, but if the methods are clearly well recognized, a mere reference to them will do; modification(s) if any, should, however, be given.

**Results:** Only such (tables/figures) data as are essential for understanding the discussion and main conclusions emerging from the study should be included. The data should be arranged in unified and coherent sequence so that the report develops clearly and logically. The data should be statistically analysed, and the level of significance should be given. The same data should not be presented both in tabular and graphic forms. Only such tables and figures as are necessary should be given. Interpretation of the data should be taken up under discussion; in some cases, however, it may be desirable to combine results and discussion in a single section.

**Discussion:** Long, rambling discussion should be scrupulously avoided. The discussion should deal with the interpretations of results without repeating information already presented under results. It should relate the new findings to the known and include logical deductions.

**Acknowledgement:** Acknowledgement should be brief and for specific assistance only.

**References:** When citing references in the text, give the name of the authors and the year of publication in parentheses: e.g. (Patra, 2007) or (Patra and Santhanam, 2002). If there are three or more authors give only the first author followed by et al., e.g. (Suke *et al.*, 2008). If the same author (s) published more than one paper in the same year, use a, b etc to distinguish them: e.g. (Suke *et al.*, 2008a, 2008b). Cited references should be listed as "References" at the end of the text in alphabetical order. Give the name of the author, the year of publication in parentheses, the article name, the journal abbreviation (please use the abbreviation specified by the journal (if any), or refer to Chemical Abstracts), the volume number, and inclusive pagination, in that order. For chapters in books, give the name of the author, the year of publication in parentheses, the title of the chapter, the name of the book, the name of the editor, the page (inclusive), and the name and city of the publisher, in that order. For books, give the name of the author, the year of publication in parentheses, the name of the book, and the name and city of the publisher, in that order.
